

Focusing on a comprehensive approach to living with chronic pain

AT A GLANCE:

- Teva Neuroscience was established in 1995 and is headquartered in Kansas City, MO.
- Teva Neuroscience employs over 550 people.
- Teva Neuroscience is the manufacturer of the leading treatment Copaxone[®], an innovative drug designed to treat Multiple Sclerosis. Approximately 100,000 patients in the US are using Copaxone[®] today.
- Teva Neuroscience also produces Azilect[®], a leading innovative brand drug used to treat Parkinson's disease.
- Teva Neuroscience is a brand division of Teva Pharmaceuticals, the largest manufacturer of branded and generic pharmaceuticals as measured by the number of prescriptions filled. In fact, one in six prescriptions filled in the United States is a Teva product; one in four is a Teva generic product.

SHARED SOLUTIONS[®] Teva Neuroscience is patient-focused and embraces a total disease-management approach that goes beyond just filling the prescription. This is exemplified by the creation of Shared Solutions[®] (www.sharesolutions.com), a comprehensive patient MS therapy support system that provides a variety of resources to help manage the disease, including:

- **Therapy Services:** 24/7 hotline staffed by MS-certified nurses that provide disease state information, counseling, injection technique and training. On average, Shared Solutions[®] responds to 62,000 calls monthly;
- **Financial Assistance:** Shared Solutions[®] will provide information and referrals to appropriate programs, and work with your insurance plan to verify coverage;
- **MS Information:** Newly released books, brochures and training videos are made available, and teleconferences and educational seminars for patients are provided by top MS experts;
- **Injection training:** Shared Solutions[®] will provide free, home-based injection training;
- **E-resources:** An online community that offers peer-to-peer support.

When patients encounter barriers to accessing treatment, Shared Solutions[®] provides additional ways to help assure affordable access to therapy right from the start and throughout the entire therapy experience.
